Advice from the OLT if you have industry partners on your grant application.

If the organisations you refer to will be formal partner institutions, with representatives on the project team, then you are required to provide a formal letter of support for each one. They will need to adapt the proforma for partner institutions template in the instructional documents, as they will still need to provide the same information.

If these organisations are more like collaborators or just wish to indicate their support for the project, a general letter of support can also be submitted. It will need to be a formal letter on letterhead and indicate their relationship/involvement in the project and demonstrate their support. Please note that not all general letters of support are accepted as they are not required items. However we do accept these additional letters from relevant industry or governing bodies.
